

DOOR STACKER AND FEEDER

The Dakota Automation Door Stacker and Feeder are capable of handling all types of doors. Dakota Automation's door stacker and feeder are built to last with heavy-duty steel stations and steel support structure. The Dakota Automation door stacker and feeder can pick and place with accuracy. The systems use AC drive motors with encoder feedback and an Allen Bradley PLC. They can rotate doors 360 degrees or you can combine Dakota Automation's material handling equipment to rotate the doors.
